Pain/PCA Assessment	
Intensity/Location	
Protocol: NEURO.PA1	
Numerical: Patients over age 9	
Cognitively Impaired (PAINAD): Patients with advanced dementia or who are aphasic, cannot otherwise	
report pain.	
Wong-Baker Faces: Patients over age 3.	
FLACC: Children too young to communicate verbally, adults unable to communicate.	
nts.	
Behavioral Pain Scale (BPS): Intubated patients.	
Pain Management Goal/Tolerated, This Number or Less (3	
Admission)	
Pain Scale Used Behavioral (3 - 12, Intubated Patient)	
BPS: Facial Expression Relaxed	
BPS: Upper Limbs No Movement	
BPS: Compliance with Ventilation Tolerating Movement
